EXPERIENCE

FULL-STACK DEVELOPER   Jul 2015 - Present
The Logos Academy - www.thelogosacademy.com

The Logos Academy is a web application that on-boards new gym members through an expert-tested curriculum.

- Developed back-end logic for users to track their progress in program in real time
- Set up authentication and user permissions allowing admins to configure their gym's program, track members' progress and enable/disable member accounts
- Ensured web app was fully responsive on both mobile and computer displays
- Continued maintenance and management of web app after successful deployment

Key technologies: HTML5, CSS3, JavaScript, jQuery, MongoDB, Mongoose, Node.js, Express, AngularJS, MaterializeCSS, Passport, Bower, Grunt, Yeoman, Github, Digital Ocean

LEGAL ASSISTANT   Aug 2013 - July 2015
D'Amore Law Group

- Worked closely with a team of *Briefcase AI* software engineers to customize, develop and integrate an online claim management system
- This system allows clients instant access to the important details, dates and documents concerning their case
- Compiled extensive statistical report of past cases to help attorneys forecast future incoming case values

PROJECTS

LEAGUE MANAGER
DevMountain

- Fantasy football app that allows multiple users to track drafts and their own teams simultaneously
- Utilized socket.io to display real time draft pick timer and live team rosters
- Managed user information using angular-cookies and json web tokens

REAL TIME FORUM
DevMountain

- Created a real time, multi-user forum web app
- Utilized Firebase and Angular Fire to persist data
